

ABOUT ICOG-ACC

iCog-ACC is a subsidiary of iCog Labs dedicated to decentralizing and empowering children and youth to innovate and create through the use of emerging technologies.

iCog-Acc is always working towards its vision of advancing science and technology for the good of all humanity; with a special focus on advanced AI.

WHAT IS DIGITRUCK ETHIOPIA?

DigiTruck Ethiopia is a project that aims to conduct a country-wide coding tour in Ethiopian cities, delivering 100 hours of coding and robotics training as well as raising awareness about the benefits of STEAM education in each targeted location, by using a truck with a fully refurbished and digitized 40ft container equipped with laptops and electronic devices (including robots and microcontrollers) as a training hub.

DigiTruck Ethiopia aims to lay a framework for students across the country to be introduced to computers, electronics, programming, the internet of things (IoT), and other emerging technologies at an early age, creatively and interactively that is conducive to and interesting to young minds.

WHAT OPPORTUNITIES DOES DIGITRUCK ETHIOPIA BRING?

■ Programming:-

Students will be introduced to and practice using the Scratch language

■ Construction and Design

Students explore and experiment with robotic and other devices to build and design

■ Game Modification

Students design, modify and create games

WHO IS BEHIND DIGITRUCK ETHIOPIA?

Ministry Of Education

Primary stakeholder and associate coordinator

Huawei

Infrastructure and transportation sponsoring partner

Close The Gap

Construction and association partner

WHAT IS ENVISIONED?

01

Establish a platform for students to experiment with and practice using various technological tools and software to learn and acquire knowledge of 21st-century emerging technologies.

02

Deliver 100 hours of computer programming (coding) and robotics training in targeted Ethiopian cities while enhancing STEAM education awareness.

03

Advance female students' participation in STEM disciplines while narrowing the gender gap and bridging the digital divide!

iCog-ACC is ready to start the journey with its partners! We hope to see everyone join the movement, bridging the digital divide!
